# AUTHOR INDEX

## VOLUME 56

Akiyama, Kiyotaka, 137

Bean, William J., 152
Botsford, James L., 100

Chambers, Thomas M., 152
Chandler, M., 509
Chauthaiwale, Vijay M., 577
Coffino, Philip, 280
Cullen, Bryan R., 375

Davis, Rowland H., 280
Deshpande, Vasanti V., 577
de Vos, Willem M., 677
Dowling, John N., 32

Fay, Peter, 340

Glew, Robert H., 32
Goldman, Emanuel, 412
Gorman, Owen T., 152
Gottesman, Susan, 592

Harayama, Shigeaki, 677
Harboe, Morten, 648
Harman, James G., 100
Horiuchi, Kensuke, 137

Jakubowski, Hieronim, 412
Johnson, Eric A., 80
Jukes, Thomas H., 229

Kawaoka, Yoshihiro, 152
Kohara, Yuji, 137
Kropf, Darryl L., 316
Kugrens, Paul, 529
Kurjan, Janet, 180

Lai, Michael M. C., 61
Lane, D., 509
Laurenson, Patricia, 543
Lee, Robert Edward, 529
Lipke, Peter N., 180
Lowry, Charles V., 1

Matthews, Kathleen S., 123
Maurizi, Michael R., 592
Merrick, William C., 291
Mohn, William W., 482
Morris, David R., 280
Muto, Akira, 229

Nishimura, Akiko, 137
Nuss, Donald L., 561

O'Gara, Fergal, 662
Osawa, Syozo, 229
O'Sullivan, Daniel J., 662

Palukaitis, Peter, 265
Prentki, P., 509

Rine, Jasper, 543
Roossinck, Marilyn J., 265

Saha, Asish K., 32
Schantz, Edward J., 80
Silver, Simon, 195
Sleat, David, 265
Spangler, Brenda D., 622

Therwath, A., 577
Tiedje, James M., 482

Vaara, Martti, 395
van der Meer, Jan Roelof, 677

Walderhaug, Mark, 195
Watanabe, Kimitsuna, 229
Webster, Robert G., 152
Wiker, Harald G., 648
Winans, Stephen C., 12

Young, Ry, 430

Zehnder, Alexander J. B., 677
Zitomer, Richard S., 1

# SUBJECT INDEX
## VOLUME 56

Adhesion glycoproteins
  yeast sexual agglutination, 180
*Agrobacterium*-plant interactions
  signaling, 12
Amino acid selection
  editing of errors, 412
Antigen 85 complex
  *M. tuberculosis*, 648

Bacteriophage lambda
  cloning vector, 577
Bacteriophage lysis, 430
Biocontrol
  chestnut blight, 561
  fluorescent *Pseudomonas* spp., 662
  plant root pathogens, 662
Botulinum toxin, 80

Cellular polarity
  fucoid zygotes, 316
Chestnut blight
  biological control, 561
Cholera toxin, 622
Cloning vector
  phage lambda, 577
Cyanobacteria
  nitrogen fixation
    oxygen relations, 340
Cyclic AMP
  prokaryotes, 100

DNA looping, 123

Enzyme regulation
  ornithine decarboxylase, 280
*Escherichia coli*
  heat-labile enterotoxin, 622
  pLC plasmids, 137
Eukaryotes
  DNA looping, 123
  protein synthesis, 291

Flagellate-ciliate relationship, 529
Fluorescent *Pseudomonas* spp.
  plant root pathogen suppression, 662
Fucoid zygotes
  cellular polarity, 316

Gel retardation analysis
  protein-nucleic acid interactions, 509
Gene expression
  oxygen, 1
  *S. cerevisiae*, 1
Genetic code
  evolution, 229

Heat-labile enterotoxin
  *E. coli*, 622

Influenza A viruses, 152
Ion transport
  regulation, 195

*Legionellaceae*
  virulence factors, 32

*Mycobacterium tuberculosis*
  antigen 85 complex, 648

Neurotoxins in medicine, 80
Nitrogen fixation
  cyanobacteria, 340
  oxygen relations, 340

Ornithine decarboxylase
  enzyme regulation, 280
Outer membrane permeability, 395
Oxygen
  cyanobacteria, 340
  gene expression, 1
  nitrogen fixation, 340
  *S. cerevisiae*, 1

Plant root pathogens
  fluorescent *Pseudomonas* spp., 662
pLC plasmids
  *E. coli*, 137
Prokaryotes
  cyclic AMP, 100
  DNA looping, 123
Proteases, 592
Protein synthesis
  editing of errors in amino acid selection, 412
  eukaryotes, 291
Protein-nucleic acid interactions
  gel retardation, 509
Proteolysis
  regulation by, 592
*Pseudomonas* spp.
  plant root pathogen suppression, 662

Reductive dehalogenation, 482
Regulatory proteins
  complex retroviruses, 375
Retroviruses
  regulatory proteins, 375
RNA recombination
  animal viruses, 61
  plant viruses, 61

*Saccharomyces cerevisiae*
  gene expression
    oxygen, 1
  silencing, 543
Satellite RNAs
  plant viruses, 265
Sexual agglutination
  adhesion glycoproteins, 180
  budding yeasts, 180
Signaling
  *Agrobacterium*-plant interactions, 12
Silencing, 543

Transcriptional silencing, 543

Virulence factors
  *Legionellaceae*, 32
Viruses
  fungal pathogenesis, 561
  RNA recombination, 61
  satellite RNAs, 265

Xenobiotic compounds
  genetic adaptation, 677

Yeasts
  sexual agglutination
    adhesion glycoproteins, 180
